

Mail Defend!

Mail Defend is a Casual 2D shooter game.

The goal is defend incoming emails from viruses and malware attack until the emails reach the inbox.

How?

Tap the screen to fire the weapon and destroy enemies before they contaminate the emails or they impact the inbox. If a virus impacts an email, the virus will reproduce.

There are some rules:

If a virus impacts the inbox, the level of defense will decrease one unit.

If the level of defense reaches zero, the game ends.

if you fire to viruses, will be destroyed.

If you fire to emails, will be destroyed.

Destroy virus and malware

In this game, the player has allies in this battle, the Antivirus.

The antivirus help you wherever they appear on the screen, you just have to shoot to get them and will have a different effect, which can be:

- Destroy viruses that are in display at that time.
- Activate a green shield will not allow the virus to reach the inbox.
- Restore the level of defense 100 percent.
- Allow emails reach the inbox immediately.
