

PRESS RELEASE

Anomaly Studios has announced its next game, "Rise of The Fey", for Windows PCs and consoles (Xbox one and PS4).

Explore, destroy, construct and rise. Those are the promises we are making with this game. You control a character called Kall Braveheart, a creature from the world of Perrah, and you follow his quest to stop an evil witch called Brazur Dul' Waru.

The game will feature a fast paced strategic combat, advanced AI for the NPC's (characters in the world have actual lives, needs and feelings), 3 Guilds to complete and a main story to melt your heart!

Currently the game is on a prototype stage and the developers need help to get the game completed.

Following this IndieGogo campaign, <https://www.indiegogo.com/projects/rise-of-the-fey-open-world-action-adventure-rpg-action-adventure/x/15981495>, you'll find all the information about them and the project they're working on.

If everything goes well, the game will arrive in stores early 2019.

Anomaly Studios is an independent developer of desktop and console videogames. We started in 2015 by making little prototypes, tests, shader work and animation.

Now we want to bring this vision to life.
