Snake: Chasing the Prey

September 2, 2015 - Ho Chi Minh, Vietnam – TwinsDra Entertainment has announced its first mobile game, "Snake: Chasing the Prey", for Android mobile on Google Play.

You must be very familiar with the classic Snake game and had a great memory playing it. What if the old time game is revived with the current minimalist graphic design and the prey is endowed with an intelligent brain. Can you still be able to beat the game and achieve high score?

"Snake: Chasing the Prey" is an adaptation of the classic Snake game updated with beautiful graphics and the cunningly running prey. The game follows the current trend in gaming: basic yet fun and challenging game that is easy to learn to play but hard to master. The player needs to dexterously manipulate our hungry snake to chase the evil prey without frustratedly hitting itself or the wall.

Just chase the prey…. If you can!

Download the game on Google Play.

Coming to iOS soon.

About us

TwinsDra Entertainment is an independent developer of mobile games. Since founded in 2015 by a Georgia Tech student major in Artificial Intelligence and Media, we have been developing several mobile games that will be released soon in the end of this year. Our goal is to develop challenging games that will motivate players to practice to play better every time.
