Prepare for the **bloodbath!**

Game description

Zombie Annihilation is a top-down defense action game where you eliminate hordes of enemies with the heaviest of heavy weapons.

Your main weapon is an anti-tank machine gun which rips your enemies to pieces! When this isn't enough use your rocket artillery and call powerful tanks to smash all the incoming zombies.

And all this you control with a single finger!

The game has been released in two versions.

Zombie Annihilation for Android devices is a singleplayer mode where player must upgrade each weapon in order to complete further missions.

Zombie Annihilation: The Winter Duel is a port version to AirConsole where two players can play in local multiplayer mode. Computer runs the game (it's a console) and players use their mobiles as game pads. The goal is to kill more enemies than the opponent within three waves where each wave brings new weapon and enemies.

Game history

Nobody remembers what happened exactly. Everybody just knows that bad thing happened in the past and now whole world is occupied by zombies. Only few human enclaves left. It is not acceptable to live like that any day longer. It's time to take the planet back!

Author

My real name is Tobiasz Paszkowski. I am an experienced e-commerce software developer with more than 10 years of worldwide experience who always dreamed to make games but never had time, possibility, opportunity (or simply courage) to do it for a living. For two years now I spend every free moment reading, learning and developing games. Zombie Annihilation is my second final game. So now I humbly dare to call myself an independent game designer and developer ;). Toby R.

Credits

Menu graphics and compositions I have made myself. However I am not a graphic designer nor a sound engineer.

I decided to do something using the free stuff and stuff which I got a direct author permission to use.

All credits are detaily described in game under "credits" section.
