

CITY LIGHTS

THE CITY PUZZLE GAME

*Challenge yourself with the colors of the traffic lights and find the best path to reach the finish line.
Avoid the risks of the city and explore the neighborhoods.*

Citylights is a puzzle game where the objective is to explore the most beautiful attractions of the city by finding the best route to cross the street. Get as many stars as you can and collect the postcards of the eight points of interest of San Francisco.

Citylights is a puzzle game created by indie developers, a small startup company with a low budget, formed by three people that decided to invent an app game. San Francisco is the landscape where a puzzle game is built with paths that challenge the player to find the best way to solve the level. The game is fun, competitive and entertaining with its 46 levels. Citylights is a family-friendly game for all ages.

Citylights is easy to play with a basic swipe finger movement. The player is moving inside routes distinguished by the colors of the traffic lights: red, green and yellow. The time will start the countdown immediately after you swipe for the first time. Do not jaywalk, walk around to get the stars within the path and reach the finish point on time. As you progress through each level, the game becomes more complicated and difficult.

The app is available World wide, in English, on the App Store and Play Store.
