

@mos

Only you can save our @mosphere

February 7, 2016 – Australia – Indie Developer Synaptic Gaps will be releasing their premier app @mos – a modern retro arcade game for iOS.

The Aliens have found our Planet and are invading.

Their Mother-ships are deploying Invaders into our atmosphere – from every angle.

The Invaders are falling towards Earth in formation, dropping bombs along the way.

Their Mother-ships are entering orbit, unleashing powerful lasers and circling straight towards Earth.

You are in control of an advanced battle tank, hovering above Earth.

Block the Invaders with the on-board shield and send them back to their dimension with the fully automatic cannon.

Only you can save our @mosphere.

In the 1980s I was addicted to the very first computer games played on coin machines in pubs! @mos is much more sophisticated, but just as addictive! (Dr. Beryl - age 63)

@mos is a fun game to play as it combines skill and strategy for a great gameplay experience. I would recommend @mos to hardcore gamers and beginners alike. (Kiran - age 12)

@mos will be available from the [Apple App Store](#) from 19th March, 2016, free for a limited time.

@mos requires iOS8+.

For related media see the @mos press kit: www.synaptic-gaps.com/press

Synaptic Gaps Pty Ltd is an independent developer of mobile games for iOS. Founded in 2015, we are focused on delivering quality player experience and game mechanics.
