PRESS RELEASE

Italy, November 12, 2019 — **RETREAM** is delighted to announce the release of **Blastaway**, a highly playable and entertaining arena shooter, gameplay-wise heavily and shamelessly inspired to **Wizard of Wor** and graphically somewhat inspired to **The Chaos Engine**. Graphics have been pixelled by hand and music has been tracked as modules to let the player live a true 16 bit experience. And the 50 arenas, spread over 5 different stages, have been designed to make that experience intensely enjoyable... and last long! Are you brave enough to step into the arenas and clear them of the wots they swarm with?

Blastaway runs on **AmigaOS 4** and **Windows**. And it's... free!
